THEIA Prototype Mock-Up

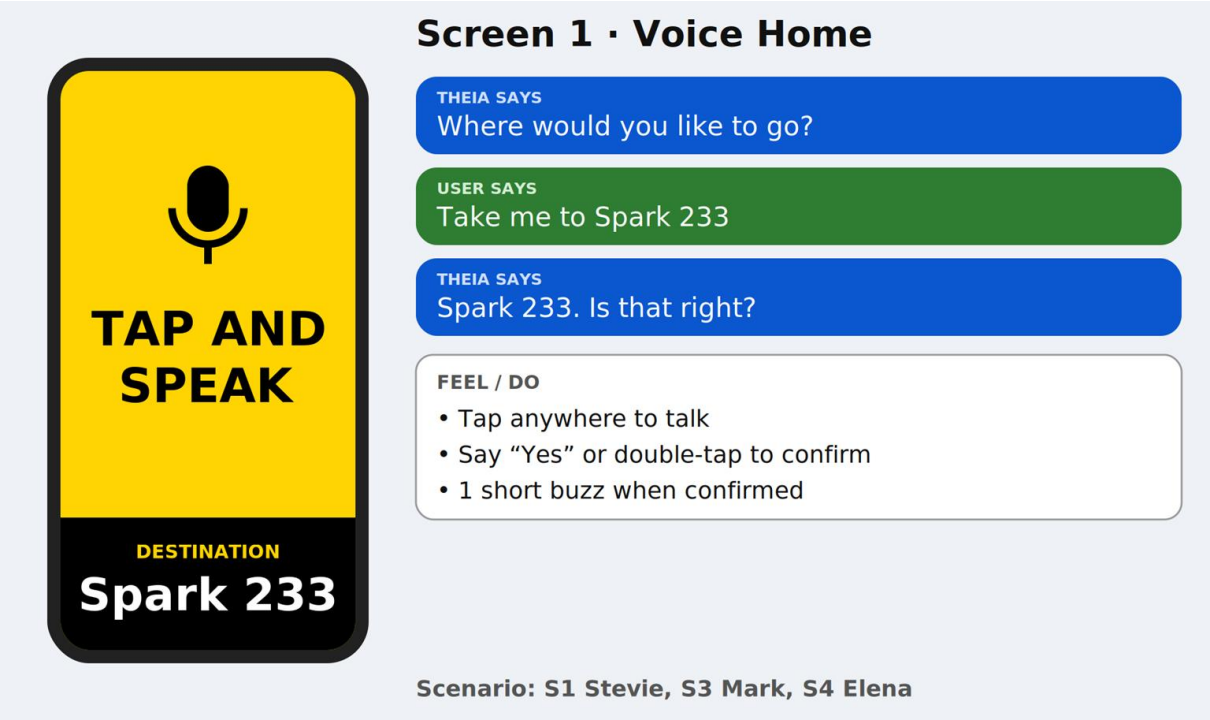

TEAM EV
Austin Aragon, Justus Jones, Young Kim, Zichuo Wang, James Zuniga

"THEIA is used by voice, touch, and vibration. The screen is a bonus, not a must."

How the user controls THEIA

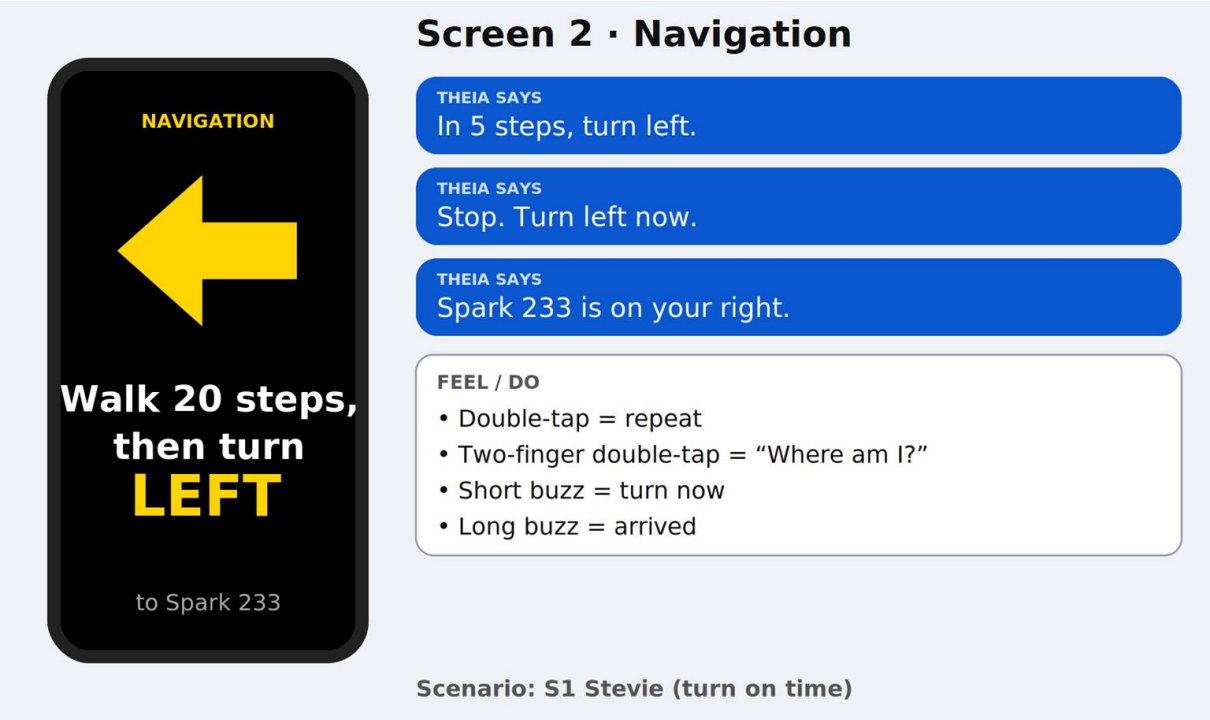

Screen 1, Voice Home

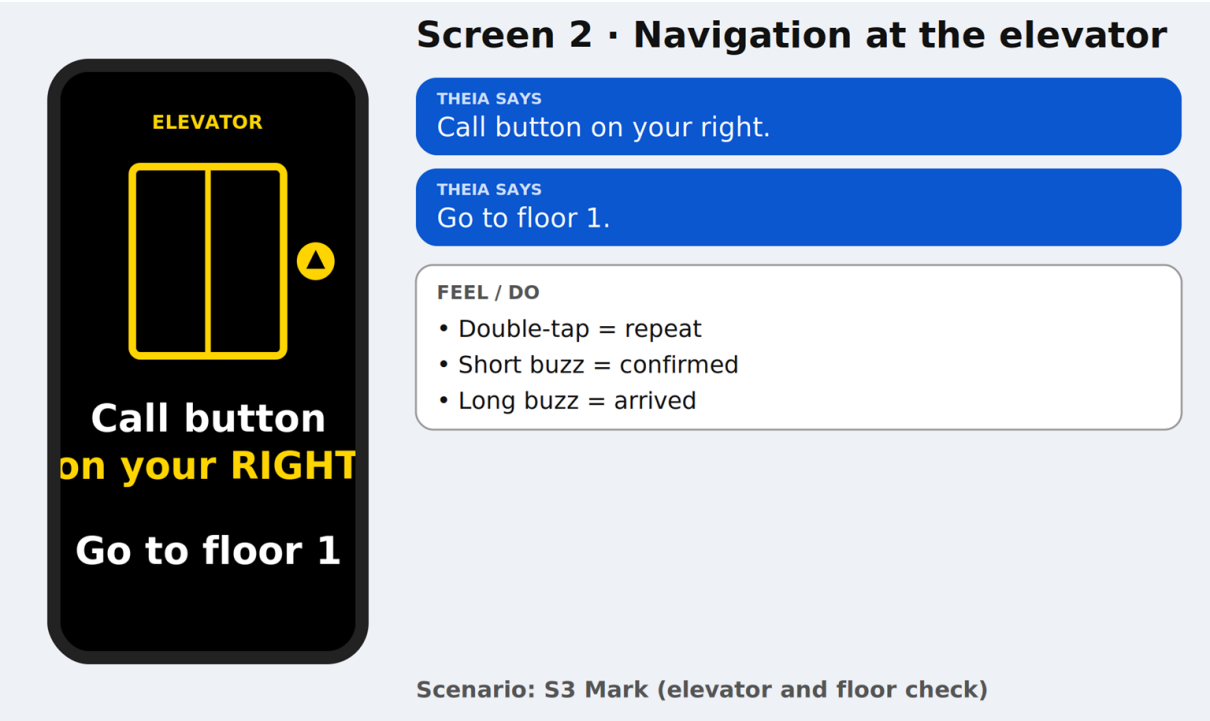

Tap anywhere to talk. Say "Yes" or double-tap to confirm. Short buzz when confirmed.

Screen 2, Navigation (non-elevator)

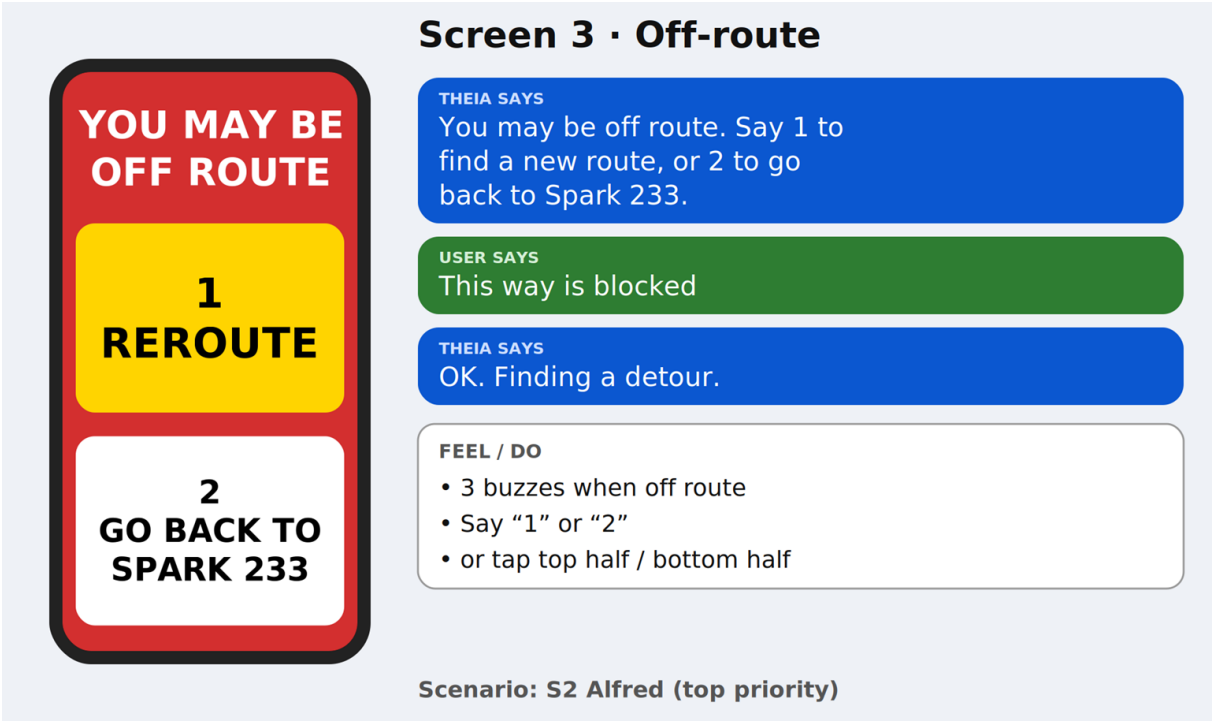

Double-tap = repeat. Two-finger double-tap = "Where am I?" Short buzz = turn now. Long buzz = arrived.

Screen 2, Navigation (elevator)

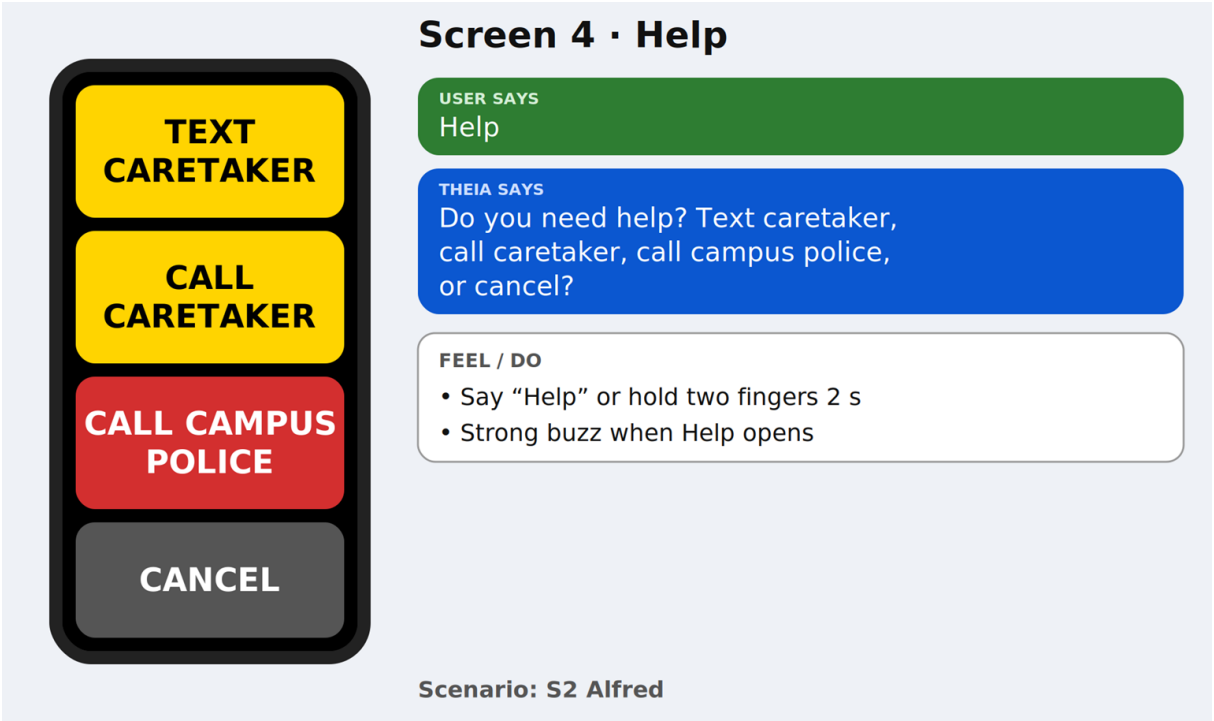

Short buzz at the elevator. THEIA says the call button side and the floor.

Screen 3, Off-route

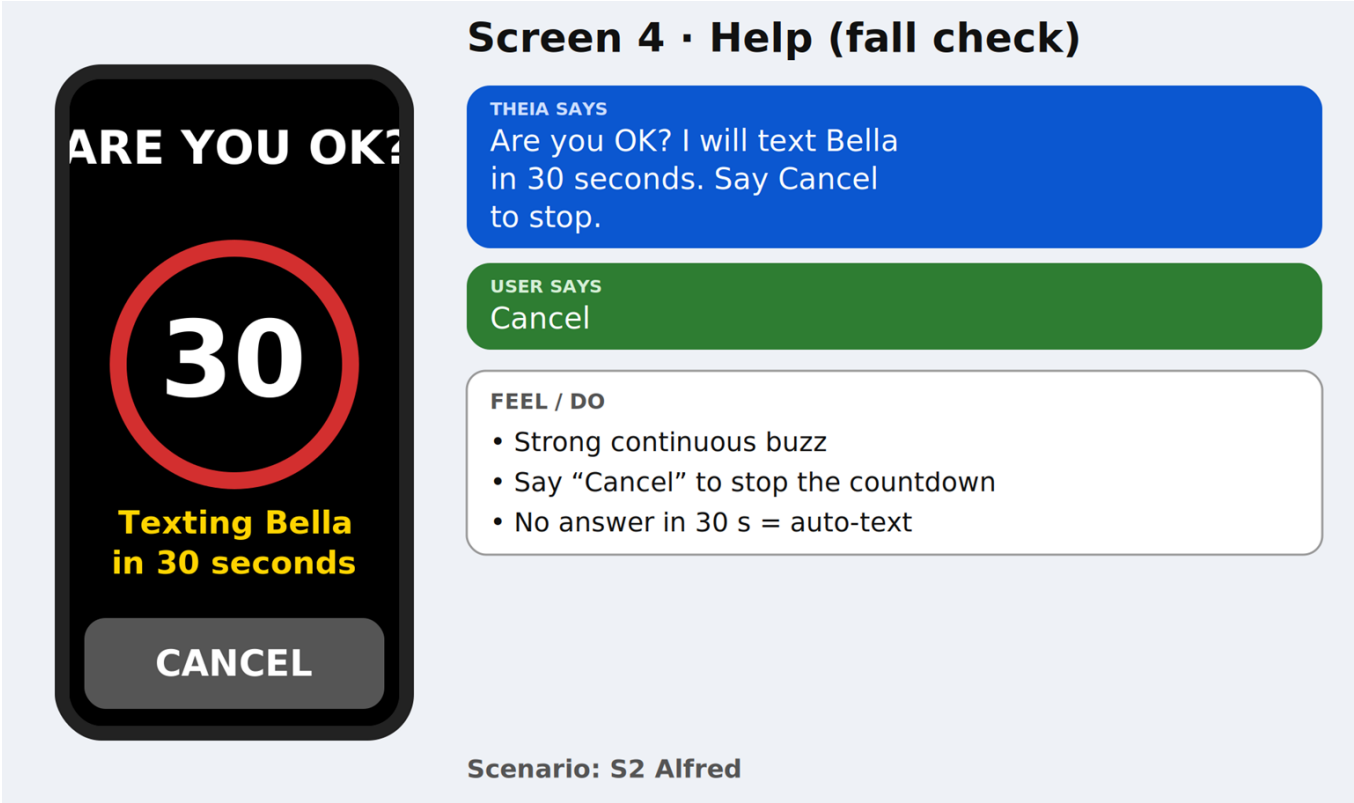

3 buzzes when off route. Say "1" or "2", or tap the top half or bottom half of the screen.

Screen 4, Help

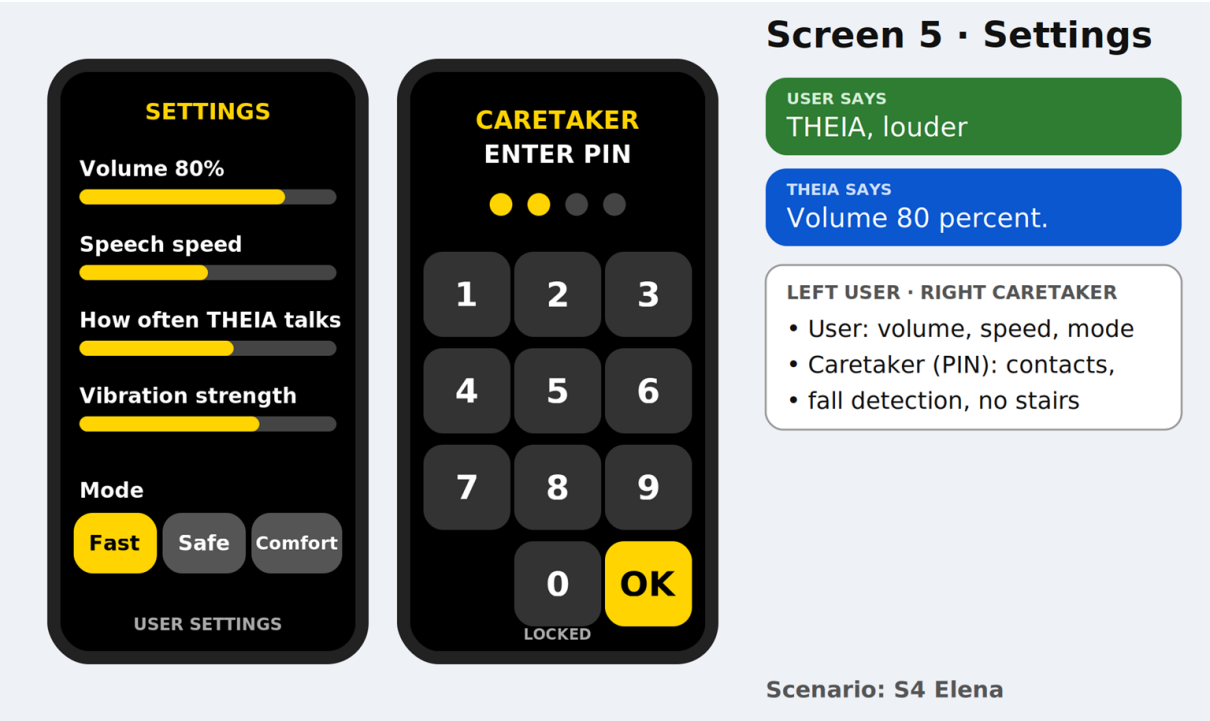

Say "Help", or hold two fingers on the screen. Strong buzz when the help screen opens.

Screen 4, Help (fall check)

Screen 5, Settings

Say "THEIA, louder" to change a setting. Caretaker settings need the PIN.

Voice commands

“User says ____”	THEIA responds
"Take me to ___"	Starts a route
"Where am I?"	Tells building, floor, nearest room, which way you face
"Repeat"	Says the last instruction again
"This way is blocked"	Finds a detour
"Help"	Opens the Help screen
"Cancel"	Stops the current action or countdown
“Louder / quieter”, “Speak faster / slower”	Changes voice volume and speech speed
"Fast mode" / "Safe mode" / "Comfortable mode"	Fast: least time. Safe: no stairs. Comfortable: fewer turns, quieter

Gestures and Vibrations

Gesture	Meaning
Tap anywhere (Voice Home)	Start talking
Double-tap	Yes/repeat instruction
Two-finger double-tap	“Where am I?”
Two-finger hold (2 s)	Help

Vibration	Meaning
1 short buzz	Turn now / confirmation
1 long buzz	You have arrived
3 buzzes	Off route warning
Strong continuous buzz	Help screen or fall check opened
